WORK EXPERIENCE

Software Developer

Enerweb

02/2022 - present

05/2016 - 12/2019

Waterfall, Midrand

Woodmead, Sandton

Worked on energy trading and management systems used by Eskom and the Southern African power pool of parties that generate and trade electricity between each other.

Project(s)

- **Market Trading Platform:** Electricity trading platform for SAPP parties to trade energy on different markets and management of bilateral agreements.
- **Energy Trading System:** Botswana power corporation system used to manage the nation's energy needs, providing annual and operational planning, forecasting and reporting.
- **Enerflow:** Cloud native reports and workflows using AWS lambda, python and Airflow connected to an Excel plugin to trigger and retrieved processed data.
- **Market Trading Platform Mobile:** Mobile application that provides a subset of the MTP functionality for Traders

The projects in the company sit in a mono repository for both front-end and backend system, I worked on initiating the project which led to fast delivery and cross team collaboration across the products in the company.

Stack: Abp Framework, Nx Monorepos, C#, SQL, PL SQL, Entity framework, JavaScript, AngularJS, SignalR, Kendo UI, WCF, Angular, Oracle, REST, AWS Cloud, Azure DevOps, Python, Apache Airflow, Postgres, Office, MAUI, DevExpress

Software Developer / Consultant

Decision Inc

01/2020 – 01/2022

Waterfall, Midrand

Software developer/consultant across different clients and industries. My work involved analyzing requirements and building software that solves the client problem. As a consultant, it was my job to offer expertise advice to clients about their systems and improvements which can be applied. Analyzing their process requirements for automation and improvements.

Project(s)

- **Makro - MCard Rewards:** Customer rewards platform to manage sales rewards and customer wallets.
- **Glencore - XQTS:** On site mining equipment management system to schedule work and proper maintenance intervals, decommissioning and introduction of new equipment.
- **Glencore - Contractors Academy:** System to register, manage, approve and assign work to contractors performing work on Glencore mines.
- **ABSA – Fundamental Review of the Trading Book:** Multiple microservices integrating various systems data to bring the trading book in a compliant state with Basil FRTB specification.
- **ASPEN – LMS:** Commercial medicine evaluation solution, used to plan, evaluate and register medicine produced by aspen pharmaceuticals.

Apart from my daily work, I was responsible to train and support junior developers, also to provide mentoring for candidates in the company graduate program.

Tools: C#, SQL, Entity framework Core, JavaScript, Micro-services, Rancher, Kubernetes, Angular, .Net Core, Azure Cloud, Azure DevOps, SharePoint, Agile, Postgres, Hadoop, Elasticsearch

Software Developer

SmartPoint IT Solutions

02/2014 - 05/2016

Waltloo, Pretoria

Developing integration between Sage 300 ERP (ACCPAC) with client system which also added customization to the UI and business routines. Worked on a web service that expose the ERP to external systems.

Project(s)

- **Integration Manager:** Sage ERP extension product which can be run as a side-car on the ERP to provide integration, this product was extended to expose its APIs as SOAP endpoints

Tools: C#, VB.NET, VB6, JavaScript, ADO.NET, C++, SQL Server, ACCPAC SDK, ASP.NET Web forms, ASP.NET MVC, WCF Services, SVN

EDUCATION

Diploma in IT

Richfield Graduate Institute

01/2012 - 12/2013
